Our Program assists local Conservation District boards in achieving their full potential! The role involves providing administrative support at meetings, managing and coordinating multiple conservation projects, and securing funding and partnerships to support district-level initiatives. The Conservation Staff Specialist will offer technical assistance on natural resource management issues, such as erosion control, urban ag, wildlife habitat, water resources, and support Farm Bill programs and conservation partnerships specific to their region.

The position requires a degree in Natural Resources or a related field, experience in conservation practices, strong communication skills, and the ability to manage multiple projects and travel regularly, including overnight stays, to rural communities.
